Evolutionary Ecology Research

Volume 13 Number 6 September 2011 Pages 557–664
ISSN 1522–0613

Parasites can simplify host-population dynamics and reduce extinction risk 557–569
M.A. Greischar and C.M. Lively

Simulation of spatial movement that potentially maximizes assessment, presence, and defence in territorial and home-ranging animals, with special reference to territorial sex-changing fishes 571–588
T.R. Brown, J. Jowers and M.M.F. Lutnesky

Pathogen-mediated selection for MHC variability in wild zebrafish 589–605
C. Smith, M. Ondračková, R. Spence, S. Adams, D.S. Betts and E. Mallon

Burrowing in the bark or in the sapwood: a dynamic game between a mother and her offspring 607–623
K. Uchinomiya and Y. Iwasa

Maintenance of sociality in a communal caterpillar, *Eucheira socialis westwoodi* (Lepidoptera: Pieridae) 625–635
J.J. Sun and D.L.A. Underwood

Using *Drosophila melanogaster* to test the effect of multiple introductions on the ability of a non-native population to adapt to novel environments 637–646
F.A. Bouchard, S.L. Lewis, C.B. Marcus, G.M. McBride and M.L. Wayne

Exploring the functional association between physiological plasticity, climatic variability, and geographical latitude: lessons from land snails 647–659
D.E. Naya, T. Catalán, P. Artacho, J.D. Gaitán-Espitia and R.F. Nespolo

Growth, mortality, and life-history scaling across species 661–664
E.L. Charnov and W. Zuo
