

Evolutionary Ecology Research

Volume 18 Number 4 July 2017 Pages 351–475
ISSN 1522–0613

- Light limitation reduces tolerance to leaf damage in *Datura stramonium* 351–362
A. Cisneros-Silva, G. Castillo, M. Chávez-Pesqueira, R. Bello-Bedoy, I.D. Camargo and J. Núñez-Farfán
- Jacks and jills: alternative life-history phenotypes and skewed sex ratio in anadromous Threespine Stickleback (*Gasterosteus aculeatus*) 363–382
J.L. Rollins, P. Chiang, J.N. Waite, F.A. von Hippel and M.A. Bell
- Body streamlining is related to higher growth in Bahamian mosquitofish 383–391
M.S. Araújo, C.A. Layman and R.B. Langerhans
- The evolution of host defence when parasites impact reproduction 393–409
A. Best, A. White and M. Boots
- Water flows shape lateral line morphology in an arid zone freshwater fish 411–428
J.L. Kelley, P.F. Grierson, P.M. Davies and S.P. Collin
- Pollinator isolation in Louisiana iris: legitimacy and pollen transfer 429–441
J.P. Shaw, S.J. Taylor, M.C. Dobson and N.H. Martin
- Ambient temperature and host specialization drive mitochondrial genome evolution in fruit flies of the genus *Bactrocera* (Diptera: Tephritidae) 443–457
H. Ben Slimen, A. Awadi and M. Makni
- Sibling diversity gives sexual reproduction the advantage in a changing environment 459–475
M. Douge and Y. Iwasa
