

Evolutionary Ecology Research

Volume 11 Number 5 July 2009 Pages 691–840
ISSN 1522–0613

- Heteromorphic and isomorphic alternations of generations in macroalgae as adaptations to a seasonal environment 691–711
K. Bessho and Y. Iwasa
- Evolution of dwarf males and a variety of sexual modes in barnacles: an ESS approach 713–729
S. Urano, S. Yamaguchi, S. Yamato, S. Takahashi and Y. Yusa
- Sexual dimorphism and the evolution of seasonal variation in sex allocation in the Hawaii akepa 731–757
L.A. Freed, R.L. Cann and K. Diller
- Male ornament variation in a sexually dimorphic seabird with variable male mating success 759–770
S.G. Wright and D.C. Dearborn
- Pairwise co-existence of Bismarck and Solomon landbird species 771–786
J.G. Sanderson, J.M. Diamond and S.L. Pimm
- A comparison of pollen-siring ability and life history between males and hermaphrodites of subdioecious *Silene acaulis* 787–801
M. Philipp, R.B. Jakobsen and G. Nachman
- Effects of pond drying on morphological and life-history traits in the anuran *Rhinella spinulosa* (Anura: Bufonidae) 803–815
M. Márquez-García, M. Correa-Solis, M. Sallaberry and M.A. Méndez
- Non-adaptive strategies explain variation in rate of development under different thermal conditions 817–825
G. Folguera, T.P. Catalán and F. Bozinovic
- Spatiotemporal analysis shows stable genetic differentiation and barriers to dispersal in the Eurasian perch (*Perca fluviatilis* L.) 827–840
S. Bergek and J. Olsson
